Profile

Aspiring Software Engineer with extensive knowledge in building APIs with NodeJS with Express or Nest Framework(REST or GraphQL). UX designer with JavaScript and ReactJs for Front End. Exceptional leadership, organisational, interpersonal, analytical, and problem resolution skills. Ability to thrive in both independent and collaborative work environments.

Work experience

Ironji trade ltd, August 6 - present, Software Engineer (FrontEnd)

- Implement dashboard feature with Next js
- Integrate the frontend UI with the backend APIs (built in GraphQL) using react-query and apollo-client.
- Test all the features using end-to-end testing with cypress
- Read books everyday and submit a summary report of at least one chapter everyday.
- Attend daily stand-ups to show what I did the previous day and what I have to do each day.

RIED Berlin, March 01 - August 15, Software Engineer (React as fronted and Shopify As Backend)

- Built regularly online stores with shopify and make sure that the details information for each item is set correctly
- Configured shopify-storefront API to facilitate the integration with any frontend UI built in React, Angular, Webflow or Wordpress.
- Built frontend UI using react and integrated it with the shopify store using [Shopify Javascript Buy SDK](#)
- Did regular meetings with clients and planned together the project roadmap
- Did daily stand-ups to say what I did the previous day and what I had to do each day.

March 3, 2021 – April 1, 2022 Octan Group – React developer

- Designed UI mockups for every feature using figma design tool
- Implemented weekly features on frontend using ReactJs with TailwindCSS and HTML
- Followed TDD on each feature I was working on by writing both unit test and integration test using React Testing Library and Jest.
- Attended daily stand-ups, weekly sprint planning and retrospective meetings
- Reviewed team members Pull requests and gave several feedbacks on repositories
- Built clients' websites using webflow using CMS.

September 7, 2020 - March 3, 2021, Andela-kigali (ATLP) - React & Node.js Developer Trainee

- Worked backend APIs using Node.js with Express framework
- Used Database servers like PostgreSQL, MongoDB, Firebase and Firestore
- Investigated and fixed remote servers like PostgreSQL on Heroku
- Used SendGrid for emailing using APIs
- Review team members Pull requests
- Wrote Testing Driven Development using Mocha and Chai
- Designed UI mockups for every feature using Figma as design tools
- Implemented weekly features on frontend using React.js with TailwindCSS and HTML
- Attended daily stand-ups, weekly sprint planning and retrospective meetings
